Venus is the only planet that rotates clockwise.

Jupiter is bigger than all the other planets combined.

It was the ~~worst~~ best idea she had ever had.

This is how we make a word appear *italic*.

It's a potato *Solanum teberosum*.

Captain Cook sailed to Australia on the *Endeavour*.

The Earth
gets one hundred tons heavier every day
due to falling space dust.

A paragraph consists of one or more sentences that form a self-contained unit of discourse. The start of a paragraph is indicated by a new line.

Text is easier to understand when it is split up into units of text. For example, a book may have chapters. Chapters can have subheadings. Under each heading there will be one or more paragraphs.

Did you ever stop to think, and forget to start again?

As A.A. Milne said, "Some people talk to animals. Not many listen though. That's the problem."

Laptop computer:

~~Was \$995~~

Now only \$375

Beware: Pickpockets operate in this area.

This toy has many small pieces and is **not suitable for children under five years old.**

On the 4th of September you will learn about $E=MC^2$.

The amount of CO₂ in the atmosphere grew by 2ppm in 2009₁.

The Story in the Book

Chapter 1

Molly had been staring out of her window for about an hour now. On her desk, lying between the copies of *Nature*, *New Scientist*, and all the other scientific journals her work had appeared in, was a well thumbed copy of *On The Road*. It had been Molly's favourite book since college, and the longer she spent in these four walls the more she felt she needed to be free.

She had spent the last ten years in this room, sitting under a poster with an Oscar Wilde quote proclaiming that "Work is the refuge of people who have nothing better to do". Although many considered her pioneering work, unraveling the secrets of the llama DNA, to be an outstanding achievement, Molly *did* think she had something better to do.

The `<code>` Element For Adding Code to Your Web Pages

The following line appears inside a `<code>` element.

```
<h1>This is a primary heading</h1>
```

The `<kbd>` Element for Keyboard Instructions

To force quit an application in Windows, hold down the `ctrl`, `alt` and `delete` keys together.

The `<var>` Element for Programming Variables

The following line is written inside a `<code>` element, while **`user-name`** is written inside a `<var>` element.

```
document.write("user-name")
```

As you can see, the content of the `<var>` element is italicized.

The `<samp>` Element for Sample Program Output

The following line uses the `<samp>` element to indicate the output from a script or program.

```
This is the output from our test script.
```
